

Hello Flying Colors Team!

Wow! What a fantastic restoration you folks did on my 1999 Mirage/Jetprop. The attention to detail far surpassed my expectations. I particularly enjoyed the process and working with Ken on the final color selection and options. The investment I made was clearly worth it. I could have gone to other shops that would have been cheaper, but the FCA team made my Jetprop the best looking one. People comment on it wherever I go.

It really has that WOW factor. I would highly recommend Flying Colors to anyone looking for the best workmanship and overall experience.

\*\*It should be noted that FCA did not paint my MT propeller...(you will see it has flaking paint in the photo). This is due to a warranty situation with MT props...they are going to paint the propeller due to their issue.

Thank you!

Dan
